Description

La présentation sera offerte en anglais et le matériel sera en français.

This session is based on the provincially established performance standards published by Alberta Education in subject-specific information bulletins and standards documents. A blueprint that reflects the standards will be developed by the participants for whichever course they are instructing. Then any of the activities, projects, tests, questions, etc., that the participants are using will be mapped onto the blueprint.

Participants should bring a copy of the program of studies for a course that they are currently instructing, several classroom assessments that they are willing to analyze. A laptop would be useful.

Présentateur(s)

Brenda Elder and Tony Cabay

from Alberta Education, Provincial Assessment Sector.
